

DIGITAL BILLBOARDS

FULLCOLOR DIGITAL DISPLAYS

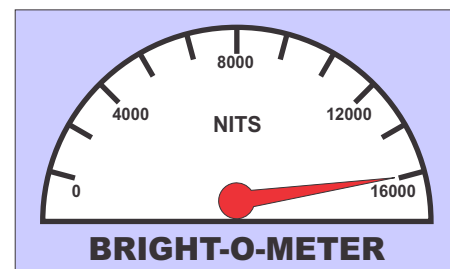

Digital billboards provide a source for advertisers to display relevant marketing messages to target audiences in a time functioning manner. It is for this reason that digital billboards have been getting a lot of attention in the outdoor industry. This new revolution in outdoor advertising has been shown to increase revenue for billboard owners. Only 1,000 out of the 450,000 billboards in the US have been upgraded to digital billboards, now is a profitable time to enter this market.

Our digital billboards are able to comply with any state or local regulations/laws. DCI billboards are adapted to work with your local and state rules, while providing a wide range of capabilities and features.
