

MULTIVISION

MULTICOLOR DIGITAL DISPLAYS

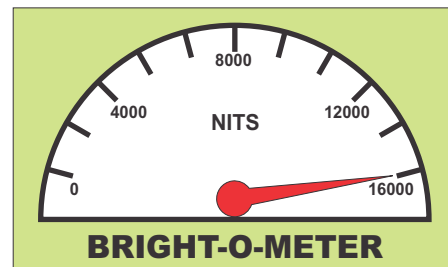

DCI's Multivision LED Display Series utilizes the latest electronic technology to present True Outdoor color combinations of Red/Green, Red/Blue, and Blue/Amber. DCI's Multivision technology allows for the best 2D/3D applications of Text, Graphics, and Animations.

If you like the impacts of a full color Display, but have a limited budget to work with, our Multivision provides you with an alternative. the Exact same equipment and function as a full color, but with a more limited color palette. DCI offers more color shades in multicolor than most suppliers offer in full color.
