

GAS PRICE

SINGLE COLOR INDICATOR UNITS

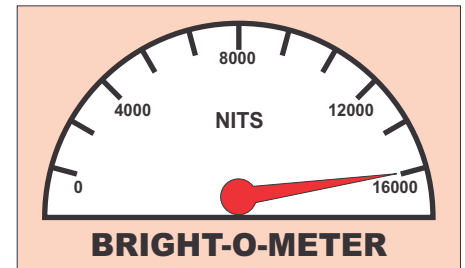

Alter prices on the spot and meet market changes as they occur. Datatronic displays can be added to your existing panel or a complete display can be provided. Especially suitable for large high-rise signs along the freeway.

Avoid a lawsuit; do not take chances with time consuming and dangerous manually changed price signs. No need to wait for expensive crane-trucks or good weather to climb your sign to change prices.

Create a LANDMARK SITE with DCI's multi-purpose, All Weather Gas Price Unit.

"Talk about saving. This sign not only saved us time, but money also, and it's just so easy to use. Not to mention the amazing visible clarity. Every gas station should have a sign like ours."

~ Jeremy

TIME & TEMPERATURE

SINGLE COLOR INDICATOR UNITS

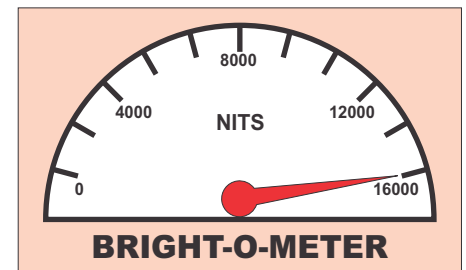

DCI Time and Temperature units are one of the most effective displays in getting customers to notice your business.

It works by getting potential customers who pass your business everyday in the habit of checking your location for the time or temperature. The more exposure these people have to your location the more likely they will become actual customers in the future due to exposure.

Don't wait any longer, make sure your business gets the attention it deserves.
